

Application Note: Wireless Backup Connection for Point of Sale / ATMs

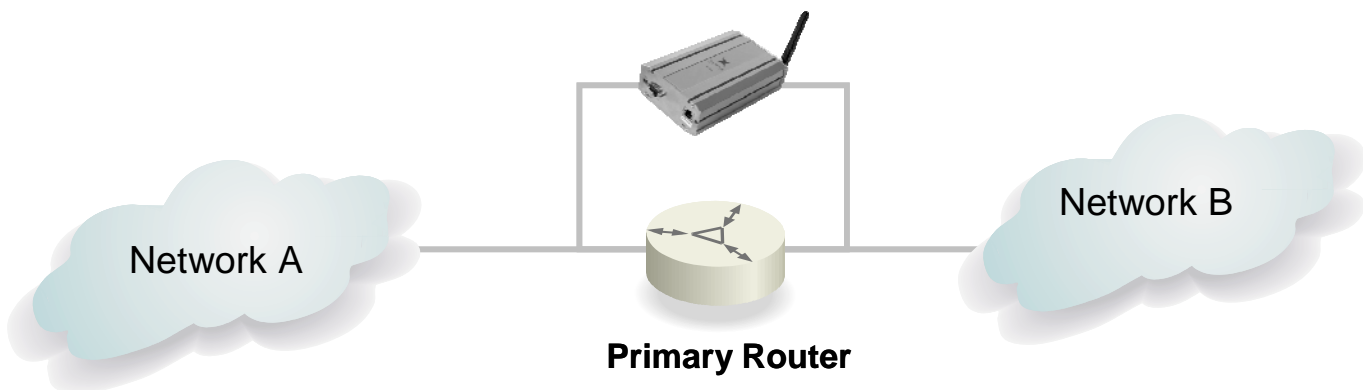

Wireless Backup Connectivity Pays Off

- No more lost revenues
- No more unhappy customers
- Do not rely on dice, use backup

- ✓ If a primary connection, typically ADSL, goes down in a shop, sales stops immediately
- ✓ In a shop with 10 counters this means tens of thousands revenue lost in a single hour
- ✓ GPRS/EDGE/3G provide seamless IP connection from a systems's point of view; instant deployment, easy to set up
- ✓ Very cost-effective
- ✓ Always-on, secure; automatic connection re-establishment
- ✓ Viola has patent pending technology that allows
 - ✓ Automatically transfer IP traffic to secondary router if the primary router fails
 - ✓ Does the above without a need to make any changes in the existing routing/switching equipment
 - ✓ Automatically switches back to the primary router when it becomes operational again

Wireless GPRS/EDGE/3G as Secondary Router
